MONTHLY MEETING: FEBRUARY 15, 2001

- *Tour - Microdyne Plastics Inc.*

Location: Microdyne Plastics Inc., 4651 E. Airport Dr.,
Ontario, CA 91761

Phone: 909-390-9080

TOUR STARTS AT 6:00 PM.

When you visit Microdyne Plastics, Inc. , you will see the commitment to producing the finest components and component assemblies available in today's competitive world market - for Injection Molding, Blow Molding, Insert Molding, Mold Manufacture & Assembly.

Since its inception in 1975, Microdyne Plastics has specialized in the molding of precision plastic parts. As evidenced by their growth in size and reputation, they have chosen their personnel carefully. Their sense of pride and dedication goes into every project they do to achieve the highest quality, economy and on-time delivery.

Armed with certification to ISO 9002 and a force of 200+ employees, Microdyne Plastics provides a cost savings to the industry by providing complete contract services with the emphasis on speed, dependability, and quality.

They are committed to producing the best designs, the most efficient tooling, the highest quality injection molded and blow molded components, and component assemblies.

Their complete line of injection molding machines range from 1 oz. to 30 oz.; 16 ton to 300 ton. Blow molders include single and dual heads, microprocessor, ranging from 100MM to 180MM.

They boast complete tool room facilities with Cincinnati Milacron Arrow 500, 3 axis CNC

capabilities.

Product and services include Custom Plastic Components, Medical Components, Electronic Components, Telecommunications, Automotive, Consumer Products. Microdyne's line of sports bottles is on of the finest available in he country today.

Secondary Services Provided by Microdyne Plastics, Inc. consist of Product Design, Silk screening, Pad Printing, Ultrasonic Welding, Bonding, Labeling, Hot Stamping, Poly Bagging, Hand & Automatic Assembly, Shrink Wrapping, and Packaging.

Other Locations include Mira Loma, CA, Tecate and Tijuana, Mexico.

Microdyne's advanced inspection techniques are among the most rigid in the industry. Their quality control department performs hourly production inspections using state-of-the-art equipment coupled with the most advanced statistical quality control procedures, custom tailored to the product.

This is one tour you will enjoy.

RECAP: ASQ MEMBERSHIP MEETING, JANUARY 18, 2001: ISO 9000: 2000

Our first General Meeting at Domenico's in Monrovia was very well received! Unfortunately, we were placed on the patio, due to the lateness of booking arrangements, which proved to be a bit cold and noisy (traffic). However, my survey of the attendees showed that they felt the food and service was from good to excellent. Understandably, the atmosphere was only rated from good to fair. Regarding the latter, future meetings (slated for the Wednesdays of March 15th, May 16th, and July 18th) will be held upstairs in a very nice banquet room (much warmer and quieter).

Our speaker, Dave Bourland, made a wonderful presentation regarding the changes in ISO 9001, 9002 from the supplier's perspective. Great delivery and excellent information!

Hope to see many more of you at our next meeting! I sincerely believe you will enjoy the food and atmosphere and, of course, our guest speakers.

Rick Lapi
Arrangements Chair
